Automatic Stops for Railroad Trains. Considering various safety devices for preventing railroad accidents in his ar-ticle, "The Growing Railway Death Roll," in the April Everybody's, Carl Snyder

"On the subway in New York City, and on the Boston elevated, operating r actically all the interurban service of hat city, there is now and for some time has been, in use a simple mechanism, a mechanical trip, by means of which when an engineer runs past a danger signal the motive power is shut off and the brakes are set mechanically. This is what is known as the Kinsman stop. It has been highly successful and has permitted much freer and closer running of trains than had theretofore been deemed possible. It is a practical and

emoustrated success. "Ita inventor has likewise developed an electric device of the same nature and this is now being tried by one or nore steam roads. It is extremely simple. It consists merely of an inner guard-rail about 120 feet in length, forming part of an open circuit in connection with the ordinary block signal. Projecting from under the engine is a heavy steel arm strong enough to resist all breakages and fixed on a stiff but sufficiently flexible spring, so that it may be knocked about without danger. The arm scrapes along the guard-rail as the engine passes over it, thereby closing the circuit, and if the signal be at danger it automatically shuts the engine-throttle and throws on the brakes. It is weather. set a little beyond the danger signal so that if the engineer has obeyed the signal it has no effect. If he has run past, the train is automatically stopped. With this device goes a very ingenious ecording apparatus, which shows every H. W. SCOTT, Attorney. has gone by his signals. It is a mechanical 'surprise test.' This recording apparatus is under lock and key and is opened only by the inspectors at the end of the run."

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the car. There is only one wayto core deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian lube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give the Hundred Dollars for an case of Deafness (caused by catarrh) that cannot be cared by Hall's Catarrh Cure. Send for circulars, free.

We refer to that boon to weak, pervous, affering women known as Dr. Pierce's Favorite Prescription.

Dr. John Fyfe one of the Editorial Staff of The Eclectic Medical, Review says of Unicorn root (Helonias Dioica) which is one of the chief ingredients of the "Favorite Prescription":

is one of the chief ingredients of the parvorite Prescription":

"A remedy which invariably acts as a uterine invigorator " makes for normal activity of the entire reproductive system." He continues "in Helonias we have a medicament which more fully answers the above purposes than any other drug with which I am nomainted. In the treatment of diseases peculiar to women it is seidom that a case is seen which does not present some indication for this remedial agant." Dr. Fyfe further says: "The following are among the leading indications for Helonias (Unicorn root). Pain or aching in the back, with sleucornoca; atonic (weak) conditions of the reproductive organs of women mental depression and irritability, associated with chronic diseases of the reproductive organs of women constant sensation of beat in the region of the kidneys; menorrhapid (fooding), due to a weakened condition of the reproductive system; amenor hops turbretsed or at mt monthly periode, Aleims from or accompanying an abnormal condition of the diseasive organs and ademic (thin blood) habit; dragging sensations in the extreme lower part of the abdonen."

If more or less of the above symptoms are present, no invalid womae can do better than take Dr. Pierce's Favorite Presemption, one of the leading ingredients of which is Unicorn root, or Helonias, and the medical properties of which it most faithfully represents.

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says:

"It is an important remedy in disorders of the womb. In all catarrhal conditions." and general enfeethement, it is useful."

Prof. John M. Scudder, M. D., late of Cincinnati, says of Golden Seal root:

"In relation to its general effects on the system, there is no medicine in use about which there is such general unanimity of opinion. It is unicersally regarded as the tonic useful in all debilitated states."

Prof. R. Barthelow, M. D., of Jefferson Medical College, says of Golden Seal:

"Valuable in uterine hemorrhage, menorrhagia (flooding) and congestive dysmenorrhosa (painful neastruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the discases for which they are recommended.
